

Acc-July 2009

Our neighborhood is looking much better thanks to all of you who have been out working in your yards, painting, re-roofing, etc.

We will be doing re-inspections in the coming weeks to assure compliance with the covenants so please be mindful of those items which are covered in the amendments like no visible water hoses, trash cans and yard decorations.

The ACC committee would also like to remind those residents who live along Country Walk Drive and have the main sidewalk in front of their property to take a look at your trees and shrubs for invasion onto the sidewalk. We have neighbors pushing baby strollers, jogging, and children biking who are being hit in the face with low hanging tree limbs and overgrown shrubs. Please be proactive about removing these overgrown limbs and shrubs.

Also a big problem is DOGS!!! Dog owners need to clean up after their own animals. If you take your dog out for a walk, you need to take supplies with you to clean up after your own animal. This is your personal responsibility, but you already know that!! The sidewalk along Country Walk Drive is often littered with dog feces. Just clean it up or leave your dog in your own yard!
