

ACC News June 2009

Welcome Spring and welcome rain!!!

With the return of spring showers, it looks like we will have lush lawns and gardens once again, but of course, along with all this rain comes the extra mowing and trimming that will accompany the growth. That being said, the ACC committee (and yes, we actually have an entire committee now) will be out looking at all properties in the neighborhood in the next 2 weeks. We are well aware of the current economic situation, and therefore we are trying to focus on those items which will give big rewards without big dollars.

If your water hose, garbage can, plastic chairs, unauthorized edging materials and lawn decorations are visible from the street, you are in violation of the ACC standards. Please take care of these items and remove them from street view.

Raking, trimming and cleaning of lawns and natural areas may involve a lot of work, but it's not a lot of money. Some mildew or mold on window sills or steps can be cleaned with a brush or broom and a little clorox and a bucket of water. Many folks have already cleaned and trimmed and their property is looking springtime fresh already. Your neighbors appreciate that.

For those of you who've been struck with spring fever, however, now is the time to get out and assess the needs of your property and make Country Walk beautiful again!
